TruLife® Anti-Reflective Acrylic

# Innovative Anti-Reflective Acrylic Developed Specifically for Direct Print and Face Mount Applications

## Now Available in 2 Versions!

Select the TruLife® product that works best for your specific applications

**TruLife Digital Acrylic** – Made with a special Digital Acrylic coating on the second surface (print/mount side) which assists with UV ink adherence when direct printing, however, it can also be used for face mounting.

**TruLife Standard Acrylic** – Features an uncoated second surface (print/mount side) which is designed specifically for face mounting, although most printers are also comfortable using this product.

All TruLife products feature an anti-reflective first surface/viewing side that is manufactured with a proprietary coating that creates a nearly invisible surface, eliminating distracting reflections and annoying glare associated with other acrylics.

### Features & Benefits

**Anti-Reflective** – See your image, not your reflection

**Amazing Clarity** – Brighter colors and sharper details

**Abrasion Resistant** – Durable and scratch resistant

**Anti-Static** – Repels dust, requires less cleaning

**99% UV Protection** – Protects images from fading

**Cleans Like Glass** – No special acrylic cleaners needed
