

Conservation Clear® Glass

The highest level of UV protection under the sun.

Conservation Clear® is the standard conservation grade glass product. Most frame shops use this product as their default glass option. Conservation Clear glass provides 99% UV protection to help protect against fading. Tru Vue uses a proprietary coating process where an inorganic silica-based UV inhibiting coating is permanently cured onto the surface of a glass substrate to produce this ultra protective glass option.

Applications

- Custom framing, limited edition prints, original works of art and posters
- To help protect items of sentimental or monetary value
