

Conservation Reflection Control® Glass

Eliminates glare when you can't eliminate light.

Conservation Reflection Control® is the conservation-grade, non-glare, glass and acrylic solution. Different from the invisible finish of an anti-reflective glass product, Conservation Reflection Control is chemically etched to create a matte finish that scatters light to reduce unwanted glare. Additionally, this product provides 99% UV protection to help protect against fading. Tru Vue uses a proprietary coating process to produce this ultra-protective glass and acrylic option. A UV inhibiting coating is permanently cured onto the surface.

Applications

- Custom framing, limited edition prints, original works of art and posters
- Use to reduce glare in rooms with high volume of uncontrolled light
- Use to frame items that don't require a lot of depth - a maximum of 2 matboards stacked is recommended

Available Sizes

SIZE	# OF LITES PER BOX
16 x 20 inches	23
18 x 24 inches	17
20 x 24 inches	15
22 x 28 inches	12
