

# Virtually nothing between you and a better viewing experience.

**UltraVue® glass offers the same superior anti-reflective properties you've come to expect from Tru Vue, on a water white substrate.** This high-quality, anti-reflective glass product provides 70% UV protection and is optically coated to create a nearly invisible finish. Similar to its other anti-reflective products, Tru Vue uses its proprietary coating process using Magnetron Sputtering technology, which deposits precisely controlled layers of highly energized metal oxides onto a 2.0 mm water white substrate to produce the UltraVue® product. Plus, UltraVue just got even more amazing. Its newly enhanced coating makes it easier to clean and more durable.

## Applications

- Custom framing items that are not sensitive to UV damage or items that will be displayed in controlled light environment to limit UV exposure
- Items that can be reproduced or easily replaced
- Works of art or photography where color neutrality is most important

## Available Sizes

SIZE	# OF LITES PER BOX
24 x 36 inches	4
32 x 40 inches	3
36 x 48 inches	2
40 x 60 inches	2
48 x 68 inches	2

## Features

- Virtually eliminates reflections
- Filters up to 70% of UV rays
- Water White substrate provides crystal clear color transmission
- Light transmission brighten colors and contrast levels
- Enhanced surface for better durability and easy cleaning
