

Your solution for eliminating unwanted glare.

Reflection Control® Acrylic has a matte-like finish that scatters light to reduce unwanted glare. This acrylic product is a non-conservation grade solution for when UV blocking is not a priority. A great choice for large shallow framing projects, with no more than two matboards, or if a project will hang in a traffic area, where safety is a concern, such as a kids room.

Applications

- Custom framing items that are not sensitive to UV damage or items that will be displayed in controlled light environment to limit UV exposure
- Items that can be reproduced or replaced easily
- Framing for earthquake prone or high traffic areas where safety is a concern
- Use on any framing project up to two mats away from the artwork without significant resolution loss

Available Sizes

SIZE	# OF LITES PER BOX
32" x 40" (3.0 mm)	3
40" x 60" (3.0 mm)	2
48" x 96" (3.0 mm)	5
