

Reflection Control® Glass Products

Eliminates glare when you can't eliminate light.

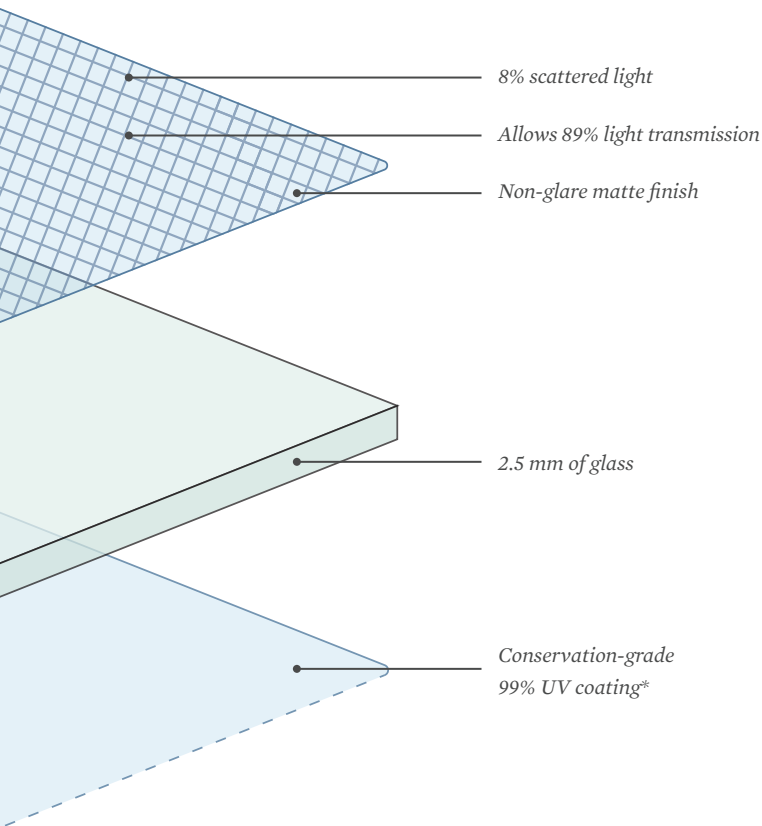

Tru Vue® offers two types of diffused glass: Reflection Control® and Conservation Reflection Control®

Reflection Control® is a diffused glass solution, while Conservation Reflection Control® is the conservation-grade, diffused glass solution. Different from the invisible finish of an anti-reflective glass product, these diffused glasses are chemically etched to create a matte finish that scatters light to reduce unwanted glare. Conservation Reflection Control® provides 99% UV protection to help protect against fading. Tru Vue® uses a proprietary coating process to produce this ultra-protective glass option. A UV inhibiting coating is permanently cured onto the surface.

Applications

- Custom framing, limited edition prints, original works of art and posters
- Use to reduce glare in rooms with high volume of uncontrolled light
- Use to frame items that don't require a lot of depth - a maximum of 2 matboards stacked is recommended

Available Sizes for Conservation Reflection Control® Glass

SIZE	# OF LITES PER BOX
915mm x 1220mm/36" x 48" (2.5mm)	4
1015mm x 1525mm/40" x 60" (2.5mm)	2

Reflection Control® Glass

SIZE	# OF LITES PER BOX
915mm x 1220mm/36" x 48" (2.5mm)	4
