TruLife® Acrylic

# The Highest Resolution Viewing Experience

**TruLife® Anti-Reflective Single-Sided Acrylic** is a unique and specialized acrylic product that was developed specifically for face/second surface mounting or direct printing on the substrate. Using TruLife® provides a contemporary look for fine art and photography, ensuring it's brilliant colors and a true to life appearance that other acrylic products simply can't match. It is manufactured with a Tru Vue® proprietary anti-reflective coating that creates a nearly invisible surface, eliminating distracting reflections and annoying glare associated with other acrylics. And unlike other acrylics that attract dust and scratch easily, TruLife® is anti-static and abrasion resistant. A truly brilliant idea!

 **TRU VUE®**

## Applications

- Face/second surface mounting or direct printing of photography, images, and signage
- Large Format Displays
- High traffic areas

## Available Sizes

SIZE	QUANTITY
